

Project Design Phase–II

Technology Stack (Architecture & Stack)

Date	04 August 2026
Team Id	
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

Technical Architecture:

User → ServiceNow Self-Service Portal → Service Catalog → Workflow / Flow Designer → Approval Process → Task Assignment → Notifications → Database → Reports & Dashboard

Table–1: Components & Technologies

S.No	Component	Description	Technology
1	User Interface	Interface for users to submit and track requests	ServiceNow Service Portal, HTML, CSS
2	Application Logic–1	Request submission and validation	ServiceNow Business Rules
3	Application Logic–2	Workflow automation and approvals	ServiceNow Flow Designer
4	Application Logic–3	Task creation and notifications	ServiceNow Notifications
5	Database	Store request and workflow data	ServiceNow Database
6	Cloud Database	Cloud-hosted platform storage	ServiceNow Cloud Platform
7	File Storage	Store attachments and request files	ServiceNow Attachment Management
8	External API–1	Optional integration for external systems	REST API
9	External API–2	Notification and communication services	Email Integration
10	Automation Engine	Process automation	ServiceNow Workflow Engine
11	Infrastructure (Server / Cloud)	Application hosting environment	ServiceNow SaaS Cloud

Table–2: Application Characteristics

S.No	Characteristics	Description	Technology
1	Open-Source Frameworks	Frontend and portal technologies	HTML, CSS, JavaScript
2	Security Implementations	Authentication, authorization and access control	Role-Based Access Control (RBAC), ACL
3	Scalable Architecture	Supports increasing users and requests	Multi-tier Cloud Architecture
4	Availability	Continuous availability through cloud deployment	ServiceNow Cloud Infrastructure
5	Performance	Automated workflows and reduced manual processing	Flow Designer, Notifications
