Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	2 Marks

Proposed Solution

Here is a concise Proposed Solution Template filled according to your project Automated Network Request Management in ServiceNow.

S.No.	Parameter	Description
1	Problem Statement	Manual network request handling is slow, time-consuming, and difficult to track, causing delays and errors.
2	Idea / Solution Description	Develop a ServiceNow application to automate network request submission, approval, task assignment, notifications, and request closure.
3	Novelty / Uniqueness	Uses automated workflows, approvals, and real-time tracking to reduce manual work and improve efficiency.
4	Social Impact / Customer Satisfaction	Provides faster service, transparent request tracking, and timely notifications, improving user satisfaction.
5	Business Model (Revenue Model)	Organizations can use the application to improve IT service management, reduce operational costs, and increase productivity.
6	Scalability of the Solution	The solution can be expanded to support multiple departments, additional request types, and large organizations with minimal changes.
